

QUESTION 1.

(a): Reverse the NumPy array: `arr = np.array([1, 2, 3, 6, 4, 5])`

```
import numpy as np

arr = np.array([1, 2, 3, 6, 4, 5])
arr = arr[::-1]
print(arr)
```

Output

```
[5 4 6 3 2 1]
```

QUESTION 1.

(b): Flatten the NumPy arr: `array1 = np.array([[1, 2, 3], [2, 4, 5], [1, 2, 3]])` using any two NumPy in-built methods

```
arr = np.array([[1,2,3], [2, 4, 5], [1, 2, 3]])
arr = arr.flatten()
print(arr)
```

Output

```
[1 2 3 2 4 5 1 2 3]
```

QUESTION 1.

(c): Compare the following numpy arrays: `arr1 = np.array([[1, 2], [3, 4]])` `arr2 = np.array([[1, 2], [3, 4]])`

```
arr1 = np.array([[1, 2], [3, 4]])
arr2 = np.array([[1, 2], [3, 4]])

print(arr1 == arr2)
```

Output

```
[[ True  True]
 [ True  True]]
```
