

ASSIGNMENT 5: SCRUM SIMULATION

QUESTION 1

Play the roles of Scrum Master, Product Owner, and Development Team in a simulated Scrum project.

PROJECT:

The project is a calculator application that performs basic arithmetic operations (addition, subtraction, multiplication, and division)

PRODUCT BACKLOG:

User should be able to:

1. Add two numbers
2. Subtract two numbers
3. Multiply two numbers
4. Divide two numbers

SPRINT BACKLOG(s):

SPRINT 1

Add two numbers

SPRINT 2

Subtract two numbers

SPRINT 3

Multiply two numbers

SPRINT 4

Divide two numbers

SPRINT 1:

Sprint Planning: The team plans to implement the addition feature.

Daily Scrum: The team discusses progress and any blockers.

Sprint Review: The team demonstrates the addition feature to stakeholders.

Sprint Retrospective: The team reflects on the sprint and identifies improvements.

Increment:

```
def add(a, b):  
    return a + b
```

SPRINT 2:

Sprint Planning: The team plans to implement the subtraction feature.

Daily Scrum: The team discusses progress and any blockers.

Sprint Review: The team demonstrates the subtraction feature to stakeholders.

Sprint Retrospective: The team reflects on the sprint and identifies improvements.

Increment:

```
def subtract(a, b):  
    return a - b
```

SPRINT 3:

Sprint Planning: The team plans to implement the multiplication feature.

Daily Scrum: The team discusses progress and any blockers.

Sprint Review: The team demonstrates the multiplication feature to stakeholders.

SPRINT 4:

Sprint Planning: The team plans to implement the division feature.

Daily Scrum: The team discusses progress and any blockers.

Sprint Review: The team demonstrates the division feature to stakeholders.

Sprint Retrospective: The team reflects on the sprint and identifies improvements.

Increment:

```
def multiply(a, b):  
    return a * b
```

Sprint Retrospective: The team reflects on the sprint and identifies improvements.

Increment:

```
def divide(a, b):  
    if b == 0:  
        return "Error: Division by zero"  
    return a / b
```
