

# ASSIGNMENT 1

## QUESTION

Perform the process of Requirement Elicitation for a Food Delivery System.

- (a) Identify the stakeholders involved.
- (b) Enumerate the functional and non-functional requirements.

## SOLUTION

### (a) Stakeholders:

- Individuals placing food orders (Customers)
- Owners of restaurants
- Staff responsible for food preparation (Kitchen Staff)
- Personnel responsible for delivering orders (Delivery Personnel)

### (b) Functional Requirements:

#### (a) Customers:

- Ability to browse available restaurants
- Capability to place food orders
- Facility to monitor the status of their orders
- Option to make payments for orders

#### (b) Restaurant Owners:

- Ability to manage and update menu items
- Access to view incoming orders
- Capability to update the status of orders

#### (c) Kitchen Staff:

- Access to receive new orders
- Responsibility to prepare ordered food items
- Ability to update the status of food preparation

#### (d) Delivery Personnel:

- Access to receive delivery assignments
- Capability to track the status of deliveries
- Ability to update the delivery status

### (c) Non-Functional Requirements:

- **Performance:** The system should efficiently support at least 1000 users simultaneously.
- **Security:** All user data must be securely encrypted.
- **Usability:** The user interface should be clear, intuitive, and easy to use.
- **Availability:** The system should maintain an uptime of 99.9%.
- **Scalability:** The system should be capable of accommodating increased usage during peak periods.
