

Assignment 1

Question

Perform requirement elicitation for a Food Delivery System:

- (a) Identify the stakeholders involved.
- (b) List the functional and non-functional requirements.

Solution

(a) Stakeholders

- **Customers** – Individuals placing food orders via the platform.
- **Restaurant Owners** – Entities managing menus and processing incoming orders.
- **Kitchen Staff** – Personnel preparing meals based on placed orders.
- **Delivery Partners** – Associates responsible for collecting and delivering food to customers.

(b) Requirements

(b)1. Functional Requirements

- **For Customers:**
 - Browse and search available restaurants and menu items.
 - Place orders for desired meals.
 - Track real-time order and delivery status.
 - Make secure payments through integrated gateways.
- **For Restaurant Owners:**
 - Manage and update menu offerings.
 - View, accept, or reject incoming orders.
 - Update order preparation and readiness status.
- **For Kitchen Staff:**
 - Receive order notifications promptly.
 - Prepare meals accurately as per order details.
 - Update meal readiness in the system.
- **For Delivery Partners:**
 - Accept assigned delivery tasks.
 - Navigate to pickup and drop-off locations.
 - Update delivery status once completed.

(b)2. Non-Functional Requirements

- **Performance:** Support at least 1,000 concurrent users without degradation.
- **Security:** Ensure encryption of sensitive customer and transaction data.
- **Usability:** Provide a user-friendly and intuitive interface for all stakeholders.
- **Availability:** Maintain a minimum uptime of 99.9%.
- **Scalability:** Handle increased demand during peak periods efficiently.
