

Opportunity Canvas

Title:

BroBorrow: A P2P Rental Marketplace for College Students

Problem: Feb 2026

Iteration: 3rd

Users & Customers

What types of users and customers have the challenges your solution addresses?

PRIMARY USERS

- College students (1st–4th year / PG) living in hostels, PGs, or small rented flats
- Budget-conscious young adults (18–25 years)

GEOGRAPHIC FOCUS

- Especially in Tier-2 cities

BEHAVIORAL TRAITS

- Buy impulse items but use them rarely
- Friends/roommates who borrow informally but want a safer, wider network

Problems

What problems do prospective users and customers have today that your solution addresses?

- Idle items clutter tiny hostel/PG rooms (e.g., exam calculator used 2 weeks/year, cycle gathering dust)
- Short-term needs but no easy/affordable way to access items without buying new (tight pocket money)
- Informal borrowing from friends is unreliable, limited, or awkward, no trust/verification for strangers

Solutions Today

How do users address their problems today?

- Buy cheap/low-quality items and let them pile up or throw away
- Borrow awkwardly from batchmates/roommates (limited variety, delays, favors)
- Use niche apps (e.g. Zoomcar for vehicles, Furlenco for furniture) or general ones (OLX for buying used)
- Go without the item or spend unnecessarily

Solution Ideas

List product, feature, or enhancement ideas that solve problems for your target audience.

CORE PLATFORM FEATURES

- Simple mobile app for listing/borrowing any everyday item
- AI smart matching for nearby relevant items
- Short-term rentals (hours to weeks)

TRUST & SAFETY

- Mandatory student ID/college email verification
- Ratings & reviews for users
- Security fee for high-value items
- 24/7 support for disputes

PAYMENTS & LOGISTICS

- Low fees (10–15%)
- UPI payments + small deposit
- Campus-first mode (filter by college/hostel)
- Doorstep/handover points near campuses

User Value

If your target audience has your solution, how can they do things differently as a consequence? And, how will that benefit them?

- Borrow instead of buy → save anywhere from ₹50–5,000 per item, less clutter in small rooms
- Rent out idle stuff → earn some money
- Access wider variety safely via verified student network → no awkward favors, more convenience & sustainability

Adoption Strategy

How will customers and users discover and adopt your solution?

- Launch beta in Punjab colleges (Thapar, PEC, etc.) via fresher orientations & WhatsApp groups
- Social media (Instagram Reels, college pages) + free first rentals to initial users

User Metrics

What user behaviors can you measure that will indicate they adopt, use, and place value in your solution?

ENGAGEMENT METRICS

- Repeat rentals/borrows per user
- Number of searches or item views per active user per week

MARKETPLACE HEALTH

- Items listed vs. rented out (Utilization Rate)
- Average time to match a borrower with a lender
- Buyer vs Supply Ratio

RETENTION & SATISFACTION

- NPS / satisfaction score from post-rental feedback
- Low churn

Business Problems

What problem for your business does building this product, feature, or enhancement solve for your business?

MARKET OPPORTUNITY

- Monetization of idle student assets in growing sharing economy
- Increase penetration of rental apps in Tier-2 cities

COMPETITIVE ADVANTAGE

- Early entry into Punjab college ecosystem
- Strong supply proof: 69.2% calculators, 53.8% books/notes unused

REVENUE POTENTIAL

- Commission-based recurring revenue model
- High-frequency microtransactions

Budget

What's it worth to us

- MVP build + launch: ₹12,000 (Flutter/React Native app, VPS hosting, basic marketing)
- High ROI potential: High survey traction (92.3% interest) suggests strong early adoption and low CAC

Business Metrics

What business metrics can you measure that will indicate the product, feature, or enhancement is successful for your business?

GROWTH METRICS

- Monthly active users (MAU) growth
- Viral coefficient

REVENUE METRICS

- Gross transaction value (GMV)
- Platform fee revenue

EFFICIENCY METRICS

- CAC:LTV ratio
- Retention rate
